

WATER DRAIN SLOW: (Power drain pump)

- Turn off Drain Knob half way, wait for 5 sec and turn on again to release air trap
- Disconnect Drain at Check valve. Remove any debris. Drain water to bucket. If water drained good. Check your plumbing system; look for hose folding, bottle neck connector (3/4" to 1/2") , air trap etc... Refer to Installation section and/or user manual for proper hook up.
- Do not use wax, sea-salt, sand product. This will block plumbing system and damage the pump impeller.
